

LWC Meanderings

Watershed News & Reflections

LWC MISSION:

To engage and assist landowners and communities in the voluntary protection, restoration and enhancement of the Luckiamute and Ash Creek watersheds.

WHAT WE ARE:

The Luckiamute Watershed Council is a 501(c)3 non-profit comprised of stakeholders who live, work or recreate within the Luckiamute and Ash Creek watersheds.

WHO WE ARE:

George Grosch, *President/Treasurer Kings Valley/Hoskins*

Karin Stutzman, *Secretary Monmouth*

Britton Castor
Pedee

Dave Ehlers
Kings Valley/Hoskins

Jackson Stalley
Dallas

Scott Youngblood
American Bottom/Buena Vista

COUNCIL MEETINGS:

Typically held the second Thursday of every month from 6 — 8 pm.

Details and links will be posted at:
www.LuckiamuteLWC.org

The Luckiamute and Ash Creek watersheds are part of the ancestral lands of the Kalapuya Indians, who are represented today by the Confederated Tribes of Grand Ronde and the Confederated Tribes of Siletz Indians.

Expanding the Gallery Forest at LSNA

(1) Aerial view of the 60-acre formerly-leased field within LSNA North Unit. Note the large tract of gallery forest bordering the north side of the field. (2) A view of the LSNA North Unit field with gallery forest cottonwoods in the background. (3) Several acres of standing water at LSNA North Unit two weeks after 2019 Willamette flooding. Frequent flooding here provides salmonids access to nutrient-rich floodplain habitat.

By Suzanne Teller, LWC Outreach Coordinator

If you have ever visited the North Unit Loop trail at Luckiamute State Natural Area (LSNA), you might have wondered why a farm field is situated right in the middle of this Oregon Parks and Recreation Department (OPRD) property. This oblong trapezoid of open field provides an expansive view of the towering cottonwoods and bigleaf maples that grow between the north end of the trail and the Luckiamute River, but it does seem a bit out of place amidst the surrounding forested landscape.

Historically in fact, much of the landscape alongside this stretch of the Luckiamute River was dominated by floodplain forest, which looked a lot like the large remnant of cottonwood-maple-ash gallery forest that still exists here. Traditional knowledge and architectural surveys reveal that this area provided a rich source of fish, shellfish, wild game, camas root and other resources for the local Kalapuya residents. But when Euro-American settlers arrived, much of this forested landscape was converted into agricultural production, which is still the predominant land use of the surrounding landscape.

By leasing this land to farmers, OPRD has kept this area in agricultural activity—a decision that has had both its advocates and its critics over the years. But then, in 2019, the Luckiamute River ended up having the final say. When the park's namesake river decided to stretch out one of its meanders during a significant flooding event, it undercut the banks a bit too close to the existing North Unit access road—rendering this site no longer accessible to farm equipment. This was a large factor in the decision made by OPRD that same year to transition the field from an agricultural lease to an expansion of the floodplain forest.

Thanks to funding from the Oregon Watershed Enhancement Board (OWEB), Meyer Memorial Trust (MMT), Bonneville Power Administration (BPA) and PGE Habitat Fund, these 60 acres are about to be re-incorporated into the surrounding gallery forest. Crewmembers from D. Franco Contracting will begin planting 158,000 native trees and shrubs here this month, and continue stewarding this area for years to come with invasive weed treatments and inter-planting as needed. The plants that will be added here have been carefully selected to reflect what

Expanding the Gallery Forest, continued

is already growing here, what species will be best adapted to both current and future climate conditions, and which species have cultural significance to local Tribes. In total, 35 different types of trees and shrubs have been ordered from our partner nurseries—from the familiar snowberry and red osier dogwood to the less common but climate-adapted white alder and incense cedar.

The next time you visit LSNA, be on the lookout for the thousands of new plantings that will dot the field, and mark the beginning of the transformation of this land back to floodplain forest!

SAVE THE DATE!

LWC 20TH (+1) ANNIVERSARY CELEBRATION

When: Saturday, May 14, 2022 @ 1:00 - 4:00pm

Where: Emerson Vineyards

The year 2021 marked the 20th Anniversary of the Luckiamute Watershed Council—that's 20 years of watershed restoration and outreach in partnership with our watershed community! We had to delay our 2021 celebration date because of the upsurge of COVID-19 cases due to the Delta variant, but we are ready to celebrate with you in 2022! Find out more and RSVP at www.LuckiamuteLWC.org/20th-anniversary-celebration

Join the Fun-draising Committee!

The LWC is looking for volunteers of all backgrounds to join the Fundraising Committee (and yes, the emphasis is definitely on FUN!) There is no specific experience required to join the team, and we welcome your expertise in a wide range of skills and interests. Fundraising Committee members get to help plan some of our most exciting and engaging events, work with LWC staff to come up with creative ideas for thanking our donors, and engage with fellow watershed residents who are passionate about protecting the health of our rivers and lands! Find out more and submit an interest form on our website at www.LuckiamuteLWC.org/joinFRC.html

Soil and Water Conservation District Native Plant Sales Happening Now!

Your local Soil and Water Conservation Districts (SWCDs) are a great source for native plants throughout the year. Not only can your SWCD help you score the best native plant options for all your gardening and landscaping needs, you will also be able to take advantage of their knowledge, expertise and helpful resources.

Key Dates	Benton SWCD www.bentonswcd.org	Marion SWCD www.marionswcd.net	Polk SWCD www.polkswcd.com	Yamhill SWCD www.yamhillswcd.org

Welcome to LWC's New Monitoring Coordinator!

We are excited to introduce you to the newest staff member on the LWC team! On December 3, Amanda Brackett officially started her new role as the LWC's Monitoring Coordinator. Originally from Maine, Amanda graduated from Clark University with a B.A. in Environmental Science and Policy. In 2016, she moved to the West Coast and worked for several ecology research organizations in California, Oregon and Washington. The combination of her education and work experience gives her a strong background in forest ecology, extensive skills in data collection and analysis, and a passion for working in the field. During her interview, Amanda explained that she was drawn to this position because she resonated with the LWC's goal of engaging the public in watershed restoration—a component of watershed council work that she believes is essential to the sustainability and long term success of any efforts to protect and restore ecological health.

Amanda is currently pursuing an M.S. degree in Forest Ecosystems and Society at Oregon State University, studying forest microclimatology and plant physiology through the lens of adaptive forest management. As she wraps up her coursework and finishes her thesis during the first three months of 2022, Amanda will be logging in about 10 hours a week at the LWC. We wish her all the best as she prepares to defend her thesis in March, and we look forward to the transition to her half-time position in April, just in time to prepare for the 2022 temperature monitoring season! Amanda is also looking forward to putting her skills and experience to work for the LWC Monitoring program, and getting to meet landowners and community members in her new watershed community.

“I am excited about the opportunity to put all I have learned into practice and make a difference in my community.”

**—Amanda Brackett
LWC Monitoring Coordinator**

Love Your Watershed

Upcoming Virtual Sips 'n' Science Event

Logging the Luckiamute: Ramifications of Splash Dams and Log Drives

Tuesday, January 11 @ 6:30 - 8:00pm

Details and Registration at LuckiamuteLWC.org/sips-n-science-splash-damming

Speaker Bio: Stephen Dow Beckham is the Pamplin Professor of History, Emeritus, Lewis & Clark College. Educated at the University of Oregon and UCLA, Professor Beckham taught college students for 42 years. He is the author of numerous books, articles, and technical reports and is the former "Oregon Professor of the Year." He is the recipient of the Asher Distinguished Teaching Award, American Historical Association. He is on the board of the Theodore Roosevelt Presidential Library and is Chair of the Oregon Committee on Historic Preservation.

Join the FRIENDS OF THE LWC!

What does it mean to be a **FRIEND OF THE LWC?**

- Monthly "Behind the Scenes" Bulletins
- Early access to event registration
- Discounts on workshops and our online store
- **Knowing that you are helping improve the health of your watershed!**

Ready to Join?

Find out how at

www.LuckiamuteLWC.org/Friends!

We welcome donations* to support the work of the Council. All charitable donations will be used towards building the organizational resources needed to address our goals of water quality enhancement, habitat restoration and community education.

**Your contribution may be tax-deductible. The LWC will provide a letter of documentation in January 2022, following your donation.*

Upcoming Council Meetings

Join us for our LWC Monthly Meetings, typically held the second Thursday of each month. Our meetings are always open to the public and discussion topics include local watershed issues and actions. Details and Zoom links will be posted at www.LuckiamuteLWC.org.

January 13 @ 6:00 - 8:00pm (via Zoom)

February 10 @ 6:00 - 8:00pm (via Zoom)

March 10 @ 6:00 - 8:00pm (via Zoom)

To donate, go to www.LuckiamuteLWC.org/donate or you can send a check to:

165 D Street, Independence, OR 97351

Thank you to our supporters!

THANK YOU TO OUR MOST RECENT DONORS AND VOLUNTEERS!

We are so grateful to the following donors and volunteers who have contributed their hard-earned dollars and their time and energy to our conservation goals from October to December 2021. Your support of the Luckiamute Watershed Council makes a BIG difference, and helps us achieve our goal of a *healthy watershed for all*. **THANK YOU!**

Special Recognition to the LWC's Bedrock Society

A special note of thanks goes to our donors who are opting to make automatic monthly contributions to the Luckiamute Watershed Council! Like the bedrock that underlies every stream of our watershed, recurring donations provides a foundational layer of support for our organization with a steady stream of income that we can count on every month to advance our mission. Find out how you can set up a recurring monthly donation and become a part of our Bedrock Society at <https://www.luckiamutelwc.org/donate.html>
